This brand-new casebook helps readers develop their radiologic interpretation skills and become stronger, more confident consultants to their clinical colleagues. Featuring over 1,000 images, the book presents 100 cases that cover common disorders and comprise a core curriculum of head and neck radiology. The crossover areas between neuroradiology and ENT imaging--including skull base and cranial nerve assessment--are covered thoroughly. Each case begins with several images and questions that stimulate thought about the clinical situation and the diagnostic process. The answer pages summarize the imaging findings and the clinical problem...present relevant anatomic material...explain the diagnostic reasoning process...state the diagnosis...and highlight important clinical points.
