**Nucleus: A Trip into the Heart of Matter** Ray Mackintosh, Jim Al-Khalili, Björn Jonson, Teresa Peña

At the core of the atom, enshrouded by electrons, lies the nucleus. The discovery of the nucleus transformed the past century and will revolutionize this one. Though many persons associate nuclear physics with weapons of mass destruction, it is an exciting, cutting-edge science that has helped to save lives through innovative medical technologies, such as the MRI. In nuclear astrophysics, state-of-the-art theoretical and computer models help to explain the powerful stellar explosions known as supernovas, to account for how stars shine, and to describe how the chemical elements in the universe were formed.

Nucleus: A Trip into the Heart of Matter by Ray Mackintosh, Jim Al-Khalili, Bjorn Jonsen, and Theresa Penae is a lavishly illustrated book filled with lively prose and captivating details that describe the evolution of our understanding of this phenomenon. The authors, who include expert nuclear physicists and acclaimed science journalists, tell the story of the nucleus from the early experimental work of the quiet New Zealander Lord Rutherford to the huge atom-smashing machines of today and beyond. Nucleus tells of the protons and neutrons of which the nucleus is made, why some nuclei crumble and are radioactive, and how scientists came up with the "standard model," which shows the nucleus composed of quarks held together by gluons. Nucleus is also the tale of the people behind the struggle to understand this fascinating subject more fully, and of how a vibrant research community uses the power of the nucleus to probe unanswered scientific questions while others seek to harness the nucleus as a tool of twenty-first-century medicine.

Intended for a general audience, this book unravels the scientific mysteries that surround the subject of the nucleus. Anyone with a passing interest in science will delight in this guide to the nuclear age.

### **From reader reviews:**

#### **Verla Foster:**

This Nucleus: A Trip into the Heart of Matter are generally reliable for you who want to be considered a successful person, why. The key reason why of this Nucleus: A Trip into the Heart of Matter can be one of the great books you must have is usually giving you more than just simple looking at food but feed a person with information that might be will shock your previous knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions at e-book and printed types. Beside that this Nucleus: A Trip into the Heart of Matter giving you an enormous of experience for instance rich vocabulary, giving you tryout of critical thinking that we understand it useful in your day activity. So , let's have it and enjoy reading.

#### **George Kirby:**

Your reading sixth sense will not betray an individual, why because this Nucleus: A Trip into the Heart of Matter guide written by well-known writer who really knows well how to make book that could be understand by anyone who have read the book. Written throughout good manner for you, dripping every ideas and producing skill only for eliminate your own hunger then you still question Nucleus: A Trip into the Heart of Matter as good book not merely by the cover but also by content. This is one reserve that can break don't ascertain book by its cover, so do you still needing an additional sixth sense to pick that!? Oh come on your examining sixth sense already told you so why you have to listening to yet another sixth sense.

#### **Anne Bonk:**

This Nucleus: A Trip into the Heart of Matter is brand-new way for you who has fascination to look for some information since it relief your hunger of information. Getting deeper you in it getting knowledge more you know otherwise you who still having little bit of digest in reading this Nucleus: A Trip into the Heart of Matter can be the light food to suit your needs because the information inside this particular book is easy to get through anyone. These books create itself in the form which can be reachable by anyone, yes I mean in the e-book web form. People who think that in book form make them feel tired even dizzy this guide is the answer. So there isn't any in reading a publication especially this one. You can find actually looking for. It should be here for you actually. So , don't miss that! Just read this e-book type for your better life as well as knowledge.

#### **David Yoon:**

As a student exactly feel bored to reading. If their teacher requested them to go to the library as well as to make summary for some e-book, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the professor want, like asked to the library. They go to there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful pics on there. Yeah, it is for being complicated. Book is very important to suit your needs. As we know that on this

period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Nucleus: A Trip into the Heart of Matter can make you really feel more interested to read.
