Australian Palms: Biogeography, Ecology and Systematics

John Leslie Dowe

Australian Palms: Biogeography, Ecology and Systematics John Leslie Dowe

Australian Palms offers an updated and thorough systematic and taxonomic treatment of the Australian palm flora, covering 60 species in 21 genera. Of these, 54 species occur in continental Australia and six species on the off-shore territories of Lord Howe Island, Norfolk Island and Christmas Island.

Incorporating recent advances in biogeographic and phylogenetic research, *Australian Palms* provides a comprehensive introduction to the palm family *Arecaceae*, with reviews of botanical history, biogeography, phylogeny, ecology and conservation. Thorough descriptions of genera and species include notes on ecology and typification, and keys and distribution maps assist with field recognition. Color photographs of habit, leaf, flowers, fruit and unique diagnostic characters also feature for each species.

This work is the culmination of over 20 years of research into Australian palms, including extensive field-work and examination of herbarium specimens in Australia, South-East Asia, Europe and the USA.

There are a lot of people who recommended this book. These folks were enjoying reading this book. In the event you did not have enough space to create this book you can buy often the e-book. You can m0ore simply to read this book from the smart phone. The price is not too costly but this book features high quality.

Lawrence Fox:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you might have done when you have spare time, and then why you don't try point that really opposite from that. One activity that make you not experience tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Australian Palms: Biogeography, Ecology and Systematics, you may enjoy both. It is very good combination right, you still want to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't get it, oh come on its called reading friends.

Brant Castillo:

As a student exactly feel bored to reading. If their teacher requested them to go to the library or make summary for some publication, they are complained. Just small students that has reading's spirit or real their passion. They just do what the educator want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring and can't see colorful images on there. Yeah, it is to get complicated. Book is very important for yourself. As we know that on this

age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Australian Palms: Biogeography, Ecology and Systematics can make you experience more interested to read.
