## **Braiding & Knotting: Techniques and Projects** Constantine A. Belash

All you need is three or more pieces of string, rope, cord, or some other pliable material and you're ready to begin! This book will teach you how to braid, weave, and knot them in hundreds of different ways, from simple three-stranded braiding through the attractive — though more complex — macramé knotting. Complete, easy-to-follow instructions begin with braiding and weaving with anywhere from three to nine strands. Flat braiding, solid braiding, braiding over multiple strands, weaving across stationary strands, and many other techniques are covered. Each yields a different texture and pattern, so that with the imaginative use of color the results can be quite attractive. The knotting section covers the many different kinds of knots (square, spiral square, triple, half hitch, etc.) and how to use them in various decorative or functional ways. Fifty-seven drawings are especially helpful in adding clarity to the directions. Along with these instructions there are directions for making numerous articles with your braids and knots: belts, lanyards, mats, rugs, sandals, hats, bags — only your imagination will limit the number of things you can make. Anyone inclined to take up braiding and knotting will find this book immensely helpful, not only in getting started, but in going through the advanced stages of crafts.
