Richard III and the ultimate game for the throne C Derbyshire

This is no mythical kingdom. This is England.

This is not fiction, but complete fact. Don't they say that the truth is stranger than fiction?

This was the 15th Century and in this green and pleasant land, numerous players took their chances in the ultimate game. The prize was the throne of England.

The game was harsh and it was brutal.

Rival families went to war, leaving cousins dead on the battlefield. Brother fought brother as power corrupted and twisted men's souls. Families were imprisoned and executed. Men were dragged from holy places and murdered where they stood. Advisors schemed and swapped sides. King murdered king in the Tower of London.

And it finally ended with a glorious battle charge to either absolute victory or certain death.

This was the Wars of the Roses.

For thirty years a brutal and bloody civil war ravished the country. The two rival royal houses, York and Lancaster, fought for control and for the crown. During this period the throne changed hands seven times. Two kings were murdered in the Tower. Princes of the realm were executed in cold blood. The period includes immortal figures from history, Henry VI, Edward IV, The Princes in the Tower, Margaret Beaufort, Henry Tudor, Elizabeth of York and the Kingmaker himself, Richard Neville, Earl of Warwick.

But there was one figure that lived the entire war. One figure that was central to the conflict. One figure that still divides opinion today.

Richard III.

This is his story and the game that he played for the throne of England.
