Kundalini: The Direction of Future Research Gopi Krishna

According to Gopi Krishna, Kundalini is the super-intelligent life energy in our bodies that is guiding the evolution of the human race towards a new faculty of mind—Cosmic Consciousness. He believed that research into Kundalini is the most important endeavor for humanity to undertake at this time, and that the implications of this research are so far-reaching that the very survival of the human race depends on it. This book gives a clear description of the avenues of research that need to be explored in order to validate the existence of Kundalini. The knowledge gained from this research will also be of great benefit to those individuals in whom this transformative process is highly active.
