Building Structures with Young Children (Young Scientist)

Ingrid Chalufour, Karen Worth

Building Structures with Young Children (Young Scientist) Ingrid Chalufour, Karen Worth

From playground equipment to skyscrapers, structures are everywhere. The second unit in the Young Scientist series, *Building Structures with Young Children* guides children's explorations to help deepen their understanding of the physical science present in building block structures—including concepts such as gravity, stability, and balance. Looking at science in a new way, this nationally field-tested curriculum supports the early development of important science inquiry skills such as questioning, investigating, discussing, and formulating ideas and theories.
