Disordered Defaecation: Current opinion on diagnosis and treatment (Developments in Surgery)

Disordered Defaecation: Current opinion on diagnosis and treatment (Developments in Surgery)

This book is a unique work devoted to the subject of disordered defaecation. It contains chapters written by experts in the field of ano-rectal physiology and management of disordered defaecation. The various contributions present personal views and special clinical experience of individuals. There are some personal views which we felt should be commented upon and a few areas where the experience of others has been included into the text. For the sake of completeness of each chapter, a slight overlap in some cases was inevitable. We hope the book will serve as a useful collection of opinions on a subject which until recently has been largely ignored by the medical profession. The editors Major contributors H. O. ten Cate Hoedemaker Department of Surgery, University Hospital, Rijnsburgerweg 10,2333 AA Leiden, The Netherlands G. Coremans Department of Internal Medicine, University Hospital Gasthuisberg, Here- straat 49, 3000 Leuven, Belgium S.
