Exploring Ancient Skies: A Survey of Ancient and Cultural Astronomy David H. Kelley, Eugene F. Milone

Exploring Ancient Skies brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope. The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean, the Far East, and the New World (particularly Mesoamerica), putting the ancient astronomical materials into their archaeological and cultural contexts. The authors begin with an overview of the field and proceed to essential aspects of naked-eye astronomy, followed by an examination of specific cultures. The book concludes by taking into account the purposes of ancient astronomy: astrology, navigation, calendar regulation, and (not least) the understanding of our place and role in the universe. Skies are recreated to display critical events as they would have appeared to ancient observers--events such as the supernova of 1054 A.D., the "lion horoscope," and the Star of Bethlehem. Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation. It will be useful as a reference for scholars and as a text for students in both astronomy and archaeology, and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history.

Do you want to try this extraordinary spending spare time activity?

Brian Faber:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your day time to upgrading your mind expertise or thinking skill actually analytical thinking? Then you are having problem with the book than can satisfy your short time to read it because this all time you only find reserve that need more time to be examine. Exploring Ancient Skies: A Survey of Ancient and Cultural Astronomy can be your answer since it can be read by you who have those short spare time problems.

Jesse Ward:

As a student exactly feel bored to be able to reading. If their teacher inquired them to go to the library in order to make summary for some publication, they are complained. Just minor students that has reading's soul or real their pastime. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important to suit

your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Exploring Ancient Skies: A Survey of Ancient and Cultural Astronomy can make you truly feel more interested to read.
