* Concentrates on the parts of J2EE that readers find most interesting, accessible, and relevant for the start of their professional career – JSP and Servlets, rather than in depth coverage of EJB—helps reader accomplish something and may spark interest for further exploration of J2EE.

* This title will concentrate on web development (using JSP and Servlets) but still be aimed at programmers who want to become J2EE developers – so it will be a title for the Java category, not JavaServer Pages.
