Targeted Capital: The Art Of Low Risk High Reward Trading Christopher Malach

Written by a professional trader, Targeted Capital focuses on the necessary psychology needed to be successful in the market and outlines, in high detail, ten specific trades that the author uses on a daily basis to pull consistent profits out of the market. The first half of the book focuses on market philosophy and psychology and is presented in an interesting and engaging fashion instead of the typical "textbook" manner. Traders of all levels will connect with and see themselves in the lessons and stories presented in the philosophy and psychology portion. The second half focuses on specific trade setups that work on a daily basis in the market. Each trade presented comes with a full description of key checkpoints leading up to the trade, the entry, the risk control, and confirming indicators as well as several charts per setup showing the trade in action. In addition to explaining the trade's price action, the trade setups also show the market psychology behind each trade. Targeted Capital contains information relevant to all traders ranging from beginners to Wall Street veterans. Targeted Capital has been described as "A book that is clearly written by a trader for other traders. It is not a book written by someone who only knows how to write about the market but does not trade themselves."
