Bioseparations Science and Engineering (Topics in Chemical Engineering) Roger G. Harrison, Paul W. Todd, Scott R. Rudge, Demetri Petrides

Designed for undergraduates, graduate students, and industry practitioners, *Bioseparations Science and Engineering* fills a critical need in the field. Current, comprehensive, and concise, it covers bioseparations unit operations in greater depth than other texts on this topic. In each of the chapters, the authors use a consistent method of explaining unit operations, starting with a qualitative description noting the significance and general application of the unit operation. They then illustrate the scientific application of the operation, develop the required mathematical theory, and finally, describe the applications of the theory in engineering practice, with an emphasis on design and scaleup. Unique to this text is a chapter dedicated to bioseparations process design and economics, in which a process simulator, SuperPro Designer® is used to analyze and evaluate the production of three important biological products. Other unique features include basic information about bioproducts and engineering analysis and a chapter with bioseparations laboratory exercises. *Bioseparations Science and Engineering* is ideal for students and professionals alike. **Features**

- Incorporates numerous example problems within the chapters
- Offers extensive sets of problems at the end of chapters
- Includes basic information about bioproducts
- Provides thorough coverage of analytical methods for bioproducts
- Uses the simulation software SuperPro Designer® to illustrate the analysis and evaluation of the production of citric acid, recombinant human insulin, and monoclonal antibodies
- Includes laboratory exercises that support text material
- Accompanied by a solutions manual available to instructors who adopt this text
- Supplemented by a website (www.biosep.ou.edu) with new problems and examples and links to useful databases and manufacturers of bioseparations equipment and supplies

From reader reviews:

Bruce Benedict:

In this 21st hundred years, people become competitive in most way. By being competitive at this point, people have do something to make all of them survives, being in the middle of typically the crowded place and notice through surrounding. One thing that often many people have underestimated that for a while is reading. That's why, by reading a publication your ability to survive raise then having chance to stand up than other is high. For you who want to start reading a new book, we give you that Bioseparations Science and Engineering (Topics in Chemical Engineering) book as beginner and daily reading reserve. Why, because this book is more than just a book.

Donald Wexler:

The knowledge that you get from Bioseparations Science and Engineering (Topics in Chemical Engineering) will be the more deep you looking the information that hide inside words the more you get interested in reading it. It does not mean that this book is hard to recognise but Bioseparations Science and Engineering (Topics in Chemical Engineering) giving you joy feeling of reading. The writer conveys their point in a number of way that can be understood by anyone who read the item because the author of this publication is well-known enough. This book also makes your personal vocabulary increase well. Making it easy to understand then can go along with you, both in printed or e-book style are available. We advise you for having this particular Bioseparations Science and Engineering (Topics in Chemical Engineering) instantly.

Santiago Bronson:

Playing with family within a park, coming to see the water world or hanging out with buddies is thing that usually you have done when you have spare time, and then why you don't try point that really opposite from that. 1 activity that make you not sensation tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Bioseparations Science and Engineering (Topics in Chemical Engineering), you could enjoy both. It is great combination right, you still wish to miss it? What kind of hang-out type is it? Oh occur its mind hangout fellas. What? Still don't understand it, oh come on its called reading friends.

Jessie Adams:

The book untitled Bioseparations Science and Engineering (Topics in Chemical Engineering) contain a lot of information on that. The writer explains her idea with easy means. The language is very straightforward all the people, so do not really worry, you can easy to read that. The book was compiled by famous author. The author provides you in the new age of literary works. It is possible to read this book because you can keep reading your smart phone, or gadget, so you can read the book with anywhere and anytime. If you want to buy the e-book, you can available their official web-site along with order it. Have a nice learn.
