Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning) Yasmin B. Kafai, Quinn Burke

Coding, once considered an arcane craft practiced by solitary techies, is now recognized by educators and theorists as a crucial skill, even a new literacy, for all children. Programming is often promoted in K-12 schools as a way to encourage "computational thinking" -- which has now become the umbrella term for understanding what computer science has to contribute to reasoning and communicating in an ever-increasingly digital world.

In *Connected Code*, Yasmin Kafai and Quinn Burke argue that although computational thinking represents an excellent starting point, the broader conception of "computational participation" better captures the twenty-first-century reality. Computational participation moves beyond the individual to focus on wider social networks and a DIY culture of digital "making." Kafai and Burke describe contemporary examples of computational participation: students who code not for the sake of coding but to create games, stories, and animations to share; the emergence of youth programming communities; the practices and ethical challenges of remixing (rather than starting from scratch); and the move beyond stationary screens to programmable toys, tools, and textiles.

From reader reviews:

Theodore Rios:

Within other case, little men and women like to read book Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning). You can choose the best book if you appreciate reading a book. Provided that we know about how is important a new book Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning). You can add understanding and of course you can around the world by just a book. Absolutely right, due to the fact from book you can understand everything! From your country until eventually foreign or abroad you can be known. About simple issue until wonderful thing you can know that. In this era, we are able to open a book or even searching by internet unit. It is called e-book. You can use it when you feel weary to go to the library. Let's learn.

Donald Bonilla:

What do you about book? It is not important with you? Or just adding material if you want something to explain what the ones you have problem? How about your extra time? Or are you busy particular person? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have free time? What did you do? Every person has many questions above. The doctor has to answer that question due to the fact just their can do this. It said that about e-book. Book is familiar in each person. Yes, it is suitable. Because start from on jardín de infancia until university need this specific Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning) to read.

Alan Robert:

Information is provisions for folks to get better life, information presently can get by anyone from everywhere. The information can be a understanding or any news even a problem. What people must be consider whenever those information which is within the former life are difficult to be find than now could be taking seriously which one is acceptable to believe or which one often the resource are convinced. If you obtain the unstable resource then you buy it as your main information it will have huge disadvantage for you. All those possibilities will not happen with you if you take Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning) as your daily resource information.

Eden Cohn:

A lot of e-book has printed but it differs from the others. You can get it by world wide web on social media. You can choose the best book for you, science, witty, novel, or whatever by simply searching from it. It is

called of book Connected Code: Why Children Need to Learn Programming (The John D. and Catherine T. MacArthur Foundation Series on Digital Media and Learning). You can add your knowledge by it. Without making the printed book, it might add your knowledge and make anyone happier to read. It is most essential that, you must aware about reserve. It can bring you from one destination for a other place.
