Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks)

Mohamed Bakr

Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks) Mohamed Bakr

Nonlinear Optimization in Electrical Engineering with Applications in MATLAB provides an introductory course on nonlinear optimization in electrical engineering, with a focus on applications including the design of electric, microwave and photonic circuits, wireless communications and digital filter design. Basic concepts are introduced using a step-by-step approach featuring a variety of practical electrical engineering-related examples and illustrated with MATLAB codes that the reader can use and adapt. Topics covered include classical optimization methods, one dimensional optimization, unconstrained optimization, constrained optimization, global optimization, space mapping optimization, and adjoint variable methods.

- * Basic concepts are introduced using a step-by-step approach
- * Features a variety of practical electrical engineering-related examples
- * Illustrated with MATLAB® codes that the reader can use and adapt.
- * Topics covered include: classical optimization methods, one dimensional optimization, unconstrained optimization, constrained optimization, global optimization, space mapping optimization and adjoint variable methods.

It will be essential reading for advanced students in electrical engineering and will also interest electrical engineering professionals.

From reader reviews:

Diane Worrell:

Why don't make it to become your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a book. Beside you can solve your problem; you can add your knowledge by the reserve entitled Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks). Try to make book Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks) as your friend. It means that it can to get your friend when you sense alone and beside those of course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you much more confidence because you can know anything by the book. So , we need to make new experience and also knowledge with this book.

Peter Gomez:

Are you kind of stressful person, only have 10 or perhaps 15 minute in your time to upgrading your mind proficiency or thinking skill actually analytical thinking? Then you are experiencing problem with the book than can satisfy your short space of time to read it because all of this time you only find book that need more time to be read. Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks) can be your answer as it can be read by you actually who have those short spare time problems.

James Peterson:

Reading a book being new life style in this season; every people loves to go through a book. When you learn a book you can get a lots of benefit. When you read books, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what forms of book that you have read. In order to get information about your study, you can read education books, but if you want to entertain yourself you can read a fiction books, this kind of us novel, comics, and soon. The Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks) will give you a new experience in studying a book.

Clifford Hudgins:

Don't be worry if you are afraid that this book will filled the space in your house, you could have it in e-book way, more simple and reachable. This specific Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks) can give you a lot of pals because by you investigating this one book you have thing that they don't and make you actually more like an interesting person. This book can be one of a step for you to get success. This reserve offer you information that probably your friend doesn't realize, by knowing more than additional make you to be great people. So , why hesitate? We should have Nonlinear Optimization in Electrical Engineering with Applications in MATLAB® (Computing and Networks).
